

ResumeAI Analyzer Report

ATS Score: 78/100

Job Match: 75%

Resume Summary

The candidate is a 2nd-year Computer Science student seeking an entry-level software development internship. The resume demonstrates foundational knowledge in Python, C, basic Java, web development, and simple hands-on projects.

Skills

- Python
- Java
- C
- HTML5
- CSS3
- JavaScript
- Git
- GitHub
- Matplotlib
- Data Structures

Strengths

- Clean and ATS-friendly plain text format with clear section headings
- Good inclusion of portfolio links (GitHub, LinkedIn, live demo host)
- Demonstrates active learning with relevant Python and Web development projects

Weaknesses

- Project descriptions lack quantifiable achievements and depth
- Missing essential backend and database technologies (e.g., SQL, Django/Flask)
- No exposure to modern software engineering practices like testing or containerization

Suggestions

- Learn SQL/Database management and incorporate database integration into projects
- Build a full-stack or API-driven project using Python frameworks like Flask or Django

- Quantify project outcomes and specify algorithms/libraries used to add technical depth
- Add LeetCode or HackerRank profile stats to validate DSA and logic-building skills
