OBJECTIVE

A motivated 2nd-year **Computer Science & Engineering** student with a strong foundation in **Python** and **Java**. Passionate about logic building and software development. Seeking a beginner-level internship to apply my technical skills in a professional environment and contribute to meaningful projects.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering | 2024 – 2028 *GN Group of Institutes (Affiliated with AKTU)* * **Relevant Coursework:** Data Structures (Foundations), Object-Oriented Programming, Logic Building, Python Fundamentals.

Senior Secondary (Class XII) | [*CBSC*]

TECHNICAL SKILLS

- **Programming Languages:** Python (Core), Java (Basics), C.
- **Web Development:** HTML5, CSS3, JavaScript (Fundamentals).
- **Tools & Platforms:** VS Code, Git, GitHub, GitHub Pages.
- **Areas of Interest:** Data Structures (DSA), Logic Building, Web Hosting.

PROJECTS

AI Voice Assistant | Python * Developed a functional voice-controlled assistant capable of handling basic user commands such as time checks and web searches.

- Gained hands-on experience with Python libraries and API integration.

Web-Based Calculator | HTML, CSS, JavaScript * Built a fully responsive calculator for mathematical operations.

- Successfully deployed the project on **GitHub Pages** for live web access.

Word Frequency Analyzer | Python & Matplotlib * Created a script to parse text files and identify word frequency.

- Utilized **Matplotlib** for basic data visualization of the results.

STRENGTHS

- **Quick Learner:** Highly adaptable to new technologies and coding environments.
- **Problem Solving:** Dedicated to improving logic and debugging skills through regular practice.
- **Consistency:** Committed to daily coding and building portfolio projects alongside college academics.
